RE: Revised Operations and Maintenance Manual
NPDES Permit NV0024228
Nevada Environmental Response Trust
Henderson, Nevada

Dear Ms. Lingenfelter:

The Nevada Environmental Response Trust (NERT), is pleased to present Revision 2 of the Operations & Maintenance (O&M) Manual for the NERT - SNWA Weir Dewatering Water Treatment Plant. As discussed during our May 29, 2018 telephone conversation, this revision includes discussion of ferric chloride coagulant use to aid in management of total suspended solids (TSS). This letter serves as a formal request for approval to use the ferric chloride coagulant at the Water Treatment Plant.

In addition to the revision regarding use of coagulant, additional minor changes to the O&M Manual have been made to reflect modified operational processes determined through the plant commissioning and first months of operation as follows:

- Management of settled suspended solids at pump stations;
- Flow control at pump stations if incoming flow exceeds 6,900 gpm;
- Cyclone waste flow rates and routing options;
- Multi-media filter backwash frequency;
- Ion Exchange resin management;
- Influent tank flow management and pump operation; and
- Cyclone vessel operation.

To facilitate review of O&M Manual modifications, an electronic version of a red-line strikeout copy of the O&M Manual has also been included in this transmittal. In accordance with prior submissions, please find two signed sets of the O&M Manual (loose and 3-hole punched).

If you have any questions or concerns regarding this matter, feel to contact me at (702) 960-4309 or at steve.clough@nert-trust.com.

Office of the Nevada Environmental Response Trust

Stephen R. Clough, P.G., CEM

Remediation Director
